**Amendments to the Specification:**

**BRIEF DESCRIPTION OF THE DRAWINGS**

Figs. 1A and 1B are illustrations of treatment and imaging angles of prior art RT tables.

Figs. 2A and 2B are illustrations of treatment and imaging angles of the present invention.

Fig. 3 shows an indexing edge of a prior art Radiation Therapy table.

Figs. 4A illustrates the chamfered edge technology of the present invention and 4B shows one aspect of the present invention.

Fig. 4B shows the patient support device of the present invention in use with a C-arm.

Figs. 5A, 5B, 6A, 6B, 7A-C, 8A-C, 9A-C, 10, 11A and 11B show embodiments of the present invention:

Fig. 5A illustrates the present invention with chamfered edge indexing.

Fig. 5B illustrates the present invention with scalloped edge indexing.

Fig. 6A illustrates a patient support device of the present invention with a lip and edge notching.

Fig 6B illustrates a through hole indexing means.

Figs. 7A-7C illustrate the present invention with a vertical sidewall and the use of a device adaptor.

Figs. 8A-8C illustrate the present invention with chamfered edges and the use of a device adaptor.

Figs. 9A-9C show the patient support device of the present invention with the lip configuration.

Fig. 10 illustrates the present invention with asymmetric notching.

Fig. 11A illustrates the use of indexing grooves on the surface of the present invention.

Fig. 11B illustrates the use of indexing grooves and transverse grooves on the surface of the present invention.
